AMARA

Backend API Specification & Integration Guide

Complete Production-Grade Contracts, Response Schemas, Database DDL & SMTP Configuration

Document Version:	3.2 (Production Release)
Date Generated:	October 28, 2026
Target Audience:	Backend Developers, API Engineers, DBAs, QA
Client Application:	AMARA React Native Client (iOS & Android)
Primary Identity:	Email Authentication (Gmail SMTP Verified)
Test Accounts:	rahul@amara.com / ananya.roy@amara.com (Password@123)
Universal Test OTP:	123456

AMARA Dating App — Complete Backend API Specification & Integration Guide

Document Version: 3.1 (Complete Frontend Contracts & Multi-Language Seed Reference)

Target Audience: Backend Developers, API Engineers, Database Administrators, QA

Companion App Client: React Native Mobile Client (iOS & Android) with Dark/Light Mode & 10 Supported Languages

---

Table of Contents

1. Architecture Overview & Global Standards
2. Domain 1: Authentication & Account Lifecycle
3. Domain 2: Onboarding & Profile Setup (Steps 1 to 8)
4. Domain 3: User Profile, Presence & Preferences
5. Domain 4: Discovery Feed & Search Settings
6. Domain 5: Connections, Invites & Mutual Matches
7. Domain 6: Telegram Connect & Direct Chat Unlocking
8. Domain 7: Subscriptions & Payments (Razorpay)
9. Domain 8: Geolocation & Multi-City Matching
0. Domain 9: Safety, User Reporting & Blocking
1. Domain 10: Help Desk & Customer Support
2. Domain 11: Notifications & Communication Logs
3. Domain 12: Legal, Terms & Privacy Acceptance
4. Domain 13: Core Relational Data Model Architecture
5. Domain 14: Multi-Language Application Translations (10 Languages / 635 Keys Each)

---

1. Architecture Overview & Global Standards

1.1 Base URLs & Environments

- **Production**: `https://api.amara-app.com/api/v1`
- **Staging / QA**: `https://staging-api.amara-app.com/api/v1`
- **Local Development**: `http://localhost:9395` or LAN IP `http://192.168.1.x:9395`
- **Client Protocol**: RESTful JSON over HTTPS (with Multipart for image uploads).

1.2 Authentication & Authorization

- **Mechanism**: HTTP Bearer Token (JWT).
- **Header Format**:

```
Authorization: Bearer <JWT_ACCESS_TOKEN>
```

- All endpoints require an active Bearer Token unless explicitly marked as **Public** in this document.
- **Token Expiration**: Recommended 30 days for mobile devices (with optional refresh token rotation).
- The Axios client automatically attaches this token to every non-public request.

1.3 Standard Response Formats

Success Envelope (HTTP 200 OK / 201 Created)

```
{
  "status": "success",
  "message": "Operation completed successfully",
  "data": { ... }
}
```

(Note: Some entity endpoints return direct objects or arrays as documented per endpoint below).

Error Envelope (HTTP 400, 401, 403, 404, 409, 422, 500)

```
{
  "status": "error",
  "message": "Human-readable error description for client display",
  "code": "ERROR_CODE_STRING",
  "details": null
}
```

1.4 User Identifier Conventions

- Primary User Identifiers are string tokens formatted as `usr_man_<id>` or `usr_woman_<id>` or UUIDv4 (e.g., `"usr_man_101"`, `"usr_woman_201"`).
- Both numeric `id` and alphanumeric `userId` must be consistently supported by the backend.

1.5 Backend SMTP Configuration (Gmail SMTP)

To enable real email dispatch for registration OTPs (`POST /register`), password resets (`POST /auth/forgot-password/send-otp`), and dating notifications:

- **Service**: Gmail SMTP (`smtp.gmail.com`)
- **Port**: `465` (SSL) or `587` (TLS)
- **Authentication**: Dedicated 16-character **Google App Password** generated via myaccount.google.com/security (2-Step Verification must be enabled).
- **Environment Variables (`.env`)**:

```
SMTP_SERVICE=gmail
SMTP_HOST=smtp.gmail.com
SMTP_PORT=465
SMTP_SECURE=true
SMTP_USER=amara.dating.app@gmail.com
SMTP_PASS=abcdefghijklmnop
SMTP_FROM="AMARA Dating <no-reply@amara-app.com>"
```

1.6 Pre-Configured Test Credentials & QA Accounts

For local development, API integration testing, and mobile client verification:

Account Type	Flow / Purpose	Email Address	Password	Static Test OTP
Male User	Discovery Feed, Browse Profiles & Send Invitations	`rahul@amara.com`	`Password@123`	**`123456`**
Female User	Invitations Inbox, Approve & Decline Dates	`ananya.roy@amara.com`	`Password@123`	**`123456`**
Male User (Alt)	Secondary Discovery User	`arjun.kapoor@amara.com`	`Password@123`	**`123456`**
Female User (Alt)	Secondary Inbox User	`priya.sen@amara.com`	`Password@123`	**`123456`**

> **Development Test OTP**: When testing registration (`POST /register`), auth (`POST /auth/send-otp`), or password reset (`POST /forgot-password/send-otp`), the development environment accepts the universal test code **`123456`** .

---

2. Domain 1: Authentication & Account Lifecycle

Development Environment OTP Note

- For local development, QA testing, and automated tests, the backend should accept the static test code **`123456`** for `POST /verify-register/otp` and `POST /forgot-password/reset` .
- In production (`NODE_ENV === 'production'`), real email/SMS dispatch should be executed, and the OTP must not be exposed in client-facing logs.

2.1 Initiate Registration

- **Endpoint**: `POST /register` (or `POST /auth/register`)
- **Access**: Public
- **Description**: Initiates registration with name, email (or mobile), password, and confirmPassword. Dispatches an OTP verification code.
- **Request Body**:

```
{
  "name": "Rahul Sharma",
  "email": "rahul@amara.com",
  "password": "Password@123",
  "confirmPassword": "Password@123",
  "mobile": "9876543210"
}
```

- **Success Response (200 OK)**:

```
{
  "status": "success",
  "message": "Registration initiated. Verification code sent to rahul@amara.com.",
  "sessionId": "sess_reg_1728901234",
  "data": {
    "sessionId": "sess_reg_1728901234",
    "email": "rahul@amara.com",
    "name": "Rahul Sharma"
  }
}
```

- **Error Responses**:
- **400 Bad Request**: `{ "status": "error", "message": "Please enter a valid email address." }`
- **400 Bad Request**: `{ "status": "error", "message": "Passwords do not match." }`
- **400 Bad Request**: `{ "status": "error", "message": "Password must be at least 6 characters." }`
- **409 Conflict**: `{ "status": "error", "message": "An account with this email already exists." }`

2.2 Verify Registration OTP & Complete Account Creation

- **Endpoint**: `POST /verify-register/otp` (or `POST /verifyOtp`)
- **Access**: Public
- **Description**: Verifies the OTP, creates the user record, and issues a JWT token.

- **Request Body**:

```
{
  "email": "rahul@amara.com",
  "otp": "123456",
  "sessionId": "sess_reg_1728901234",
  "name": "Rahul Sharma",
  "password": "Password@123"
}
```

- **Success Response (200 OK)**:

```
{
  "status": "success",
  "message": "User registered successfully",
  "token": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9...",
  "userId": "usr_man_101",
  "user": {
    "id": 1,
    "userId": "usr_man_101",
    "name": "Rahul Sharma",
    "displayName": "Rahul Sharma",
    "email": "rahul@amara.com",
    "mobile": "9876543210",
    "gender": "man",
    "telegramUsername": "",
    "profile": null
  }
}
```

- **Error Response (400 Bad Request)**:

```
{
  "status": "error",
  "message": "Invalid OTP. Please check and try again."
}
```

2.3 User Login

- **Endpoint**: `POST /login` (or `POST /auth/login`)
- **Access**: Public
- **Description**: Authenticates user using email (or mobile) and password. Returns JWT token and user profile.
- **Request Body**:

```
{
  "email": "rahul@amara.com",
  "password": "Password@123"
}
```

- **Success Response (200 OK)**:

```
{
  "token": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9...",
  "userId": "usr_man_101",
  "user": {
    "id": 1,
    "userId": "usr_man_101",
    "name": "Rahul Sharma",
    "displayName": "Rahul Sharma",
    "email": "rahul@amara.com",
    "mobile": "9876543210",
    "gender": "man",
    "telegramUsername": "rahul_amara",
    "profile": {
      "age": 28,
      "bio": "Entrepreneur and travel enthusiast.",
      "photos": ["https://images.unsplash.com/photo-1500648767791-00dcc994a43e?w=800"],
      "photoVerified": true
    }
  }
}
```

- **Error Responses**:
- **400 Bad Request**: `{ "status": "error", "message": "Email and password are required." }`
- **401 Unauthorized**: `{ "status": "error", "message": "Invalid credentials. Please verify your password." }`
- **404 Not Found**: `{ "status": "error", "message": "Account not found. Please register first." }`

2.4 Forgot Password — Send OTP

- **Endpoint**: `POST /forgot-password/send-otp`
- **Access**: Public
- **Request Body**:

```
{
  "email": "rahul@amara.com"
}
```

- **Success Response (200 OK)**:

```
{
  "status": "success",
  "message": "Password reset OTP sent successfully to rahul@amara.com",
  "sessionId": "reset_sess_998124"
}
```

2.5 Forgot Password — Reset Password

- **Endpoint**: `POST /forgot-password/reset`
- **Access**: Public
- **Request Body**:

```
{
  "email": "rahul@amara.com",
  "otp": "123456",
  "sessionId": "reset_sess_998124",
  "newPassword": "NewPassword@123",
  "confirmPassword": "NewPassword@123"
}
```

- **Success Response (200 OK)**:

```
{
  "status": "success",
  "message": "Password reset successfully. You can now login with your new password."
}
```

2.6 Account Lifecycle (Deactivate, Activate, Delete)

- **Deactivate Account**: `POST /account/deactivate` (Bearer Auth)
- Query/Body: `{ userId?: string }`
- Response: `{ "status": "success", "message": "Account deactivated successfully." }`
- **Reactivate Account**: `PUT /account/activate` (Bearer Auth)
- Query/Body: `{ userId?: string }`
- Response: `{ "status": "success", "message": "Account reactivated successfully." }`
- **Permanently Delete Account**: `DELETE /account/delete` (Bearer Auth)
- Query/Body: `{ userId?: string }`
- Action: Permanently purges user record, images, subscriptions, matches, and location data in compliance with GDPR.
- Response: `{ "status": "success", "message": "Account permanently deleted." }`

---

3. Domain 2: Onboarding & Profile Setup (Steps 1 to 8)

The frontend guides newly registered users through an 8-step setup sequence:

3.1 Step 1: Gender & Orientation

- **Endpoint**: `POST /profile/gender-orientation`
- **Access**: Bearer Auth
- **Request Body**:

```
{
  "userId": "usr_man_101",
  "gender": "man",
  "orientation": "straight"
}
```

(Allowed values: gender: `"man"`, `"woman"`, `"lgbtqia"`; orientation: `"straight"`, `"lgbtqia"`)

- **Success Response (200 OK)**:

```
{
  "status": "success",
  "message": "Gender and orientation saved successfully",
  "data": {
    "userId": "usr_man_101",
    "gender": "man",
    "orientation": "straight"
  }
}
```

3.2 Step 2: Display Name & Step 3: Date of Birth

- User provides their preferred display name and birthday.
- App enforces that the user must be at least 18 years old:

- If underage: Rejects registration with `"You must be at least 18 years old to use AMARA."`
- Values are committed in final profile setup.

3.3 Step 4: Biometric Selfie Verification

- **Endpoint**: `PUT /profile/selfie/verify/:userId` (or `POST /profile/selfie/upload`)
- **Access**: Bearer Auth
- **Description**: User performs a live 3D head scan via camera. Upon completion, marks `photoVerified: true` on their profile to display the blue verified badge.
- **Success Response (200 OK)**:

```
{
  "status": "success",
  "message": "Verified",
  "data": {
    "userId": "usr_man_101",
    "photoVerified": true
  }
}
```

3.4 Step 5: Multi-Photo Upload (3 to 6 Photos)

- **Upload Image**: `POST /profile/upload-image`
- **Headers**: `Content-Type: multipart/form-data`
- **Form Field**: `photo` or `image` (binary JPEG/PNG image)
- **Query/Param**: `uid?: string`
- **Success Response (200 OK)**:

```
  {
    "status": "success",
    "message": "Image uploaded successfully",
    "imageUrl": "https://cdn.amara-app.com/photos/usr_man_101_1.jpg",
    "data": {
      "id": 101,
      "imageUrl": "https://cdn.amara-app.com/photos/usr_man_101_1.jpg",
      "isProfile": true
    }
  }
```

- **Get User Gallery Images**: `GET /users/:userId/images`
- **Success Response (200 OK)**:

```
  [
    { "id": 101, "userId": "usr_man_101", "imageUrl": "https://cdn.amara-app.com/photos/1.jpg", "isProfile": true },
    { "id": 102, "userId": "usr_man_101", "imageUrl": "https://cdn.amara-app.com/photos/2.jpg", "isProfile": false },
    { "id": 103, "userId": "usr_man_101", "imageUrl": "https://cdn.amara-app.com/photos/3.jpg", "isProfile": false }
  ]
```

- **Set Primary Profile Avatar**: `PUT /users/:userId/profile-photo/:imageId`
- **Success Response (200 OK)**: `{ "status": "success", "message": "Profile photo set successfully" }`
- **Delete Photo**: `DELETE /users/images/:imageId` (or `DELETE /users/:userId/images/:imageId`)
- **Success Response (200 OK)**: `{ "status": "success", "message": "Image deleted successfully" }`

3.5 Step 6: Connect Telegram

- **Endpoint**: `POST /telegram/connect`
- **Request Body / Query**: `{ "userId": "usr_man_101", "username": "rahul_amara" }`
- **Success Response (200 OK)**:

```
{
  "status": "success",
  "message": "Telegram account connected successfully",
  "telegramUsername": "rahul_amara",
  "telegramLink": "https://t.me/rahul_amara"
}
```

3.6 Step 7: About Me & Step 8: Extended Lifestyle Setup

- **Endpoint**: `POST /profile/:userId/setup`
- **Request Body**:

```
{
  "name": "Rahul Sharma",
  "displayName": "Rahul",
  "gender": "man",
  "orientation": "straight",
  "age": 28,
  "dob": "1998-05-15",
  "bio": "Entrepreneur and travel enthusiast passionate about art, tech, and fitness.",
  "height": 178,
  "appearance": "Attractive",
  "bodyType": "Athletic",
  "language": "English, Spanish",
  "englishLevel": "Good",
  "ethnicity": "South Asian",
  "kidCount": "Someday",
  "netWorth": "$250k+",
  "lookingFor": "Relationship, Casual Dating",
  "smoke": "No",
  "drink": "Socially",
  "photos": [
    "https://cdn.amara-app.com/photos/usr_man_101_1.jpg",
    "https://cdn.amara-app.com/photos/usr_man_101_2.jpg",
    "https://cdn.amara-app.com/photos/usr_man_101_3.jpg"
  ]
}
```

- **Success Response (200 OK)**:

```
{
  "status": "success",
  "message": "Profile setup completed successfully"
}
```

3.7 Profile Completion Calculation

- **Endpoint**: `POST /profile/completion` or `GET /profile/completion`
- **Query**: `?userId=usr_man_101`
- **Success Response (200 OK)**:

```
{
  "percentage": 100,
  "isComplete": true,
  "missingFields": []
}
```

---

4. Domain 3: User Profile, Presence & Preferences

4.1 Get Full Profile

- **Endpoint**: `GET /profile/me/:userId` (or `POST /profile/me?userId=...`)
- **Access**: Bearer Auth
- **Success Response (200 OK)**:

```
{
  "userId": "usr_man_101",
  "id": 1,
  "name": "Rahul Sharma",
  "displayName": "Rahul",
  "email": "rahul@amara.com",
  "mobile": "9876543210",
  "gender": "man",
  "orientation": "straight",
  "age": 28,
  "dob": "1998-05-15",
  "bio": "Entrepreneur and travel enthusiast.",
  "height": 178,
  "appearance": "Attractive",
  "bodyType": "Athletic",
  "language": "English, Spanish",
  "englishLevel": "Good",
  "ethnicity": "South Asian",
  "kidCount": "Someday",
  "netWorth": "$250k+",
  "lookingFor": "Relationship",
  "smoke": "No",
  "drink": "Socially",
  "city": "Mumbai",
  "state": "Maharashtra",
  "country": "India",
  "latitude": 19.0760,
  "longitude": 72.8777,
  "photoVerified": true,
  "isOnline": true,
  "lastActive": "Just now",
  "telegramUsername": "rahul_amara",
  "photos": [
    "https://images.unsplash.com/photo-1500648767791-00dcc994a43e?w=800"
  ]
}
```

4.2 Segmented Profile Updates

- **Basic Details**: `PUT /profile/update-basic` (or `PUT /profile/update`)

```
{
  "name": "Rahul Sharma",
  "displayName": "Rahul S.",
  "bio": "Updated bio text here...",
  "dob": "1998-05-15",
  "age": 28
}
```

- **Physical & Background Details**: `PUT /profile/update-details`

```
{
  "height": 180,
  "language": "English, Spanish, Hindi",
  "appearance": "Attractive",
  "bodyType": "Athletic",
  "englishLevel": "Very Good",
  "ethnicity": "South Asian",
  "kidCount": "No kids",
  "netWorth": "$250k - $500k"
}
```

- **Lifestyle & Preferences**: `PUT /profile/update-preferences`

```
{
  "lookingFor": "Long-term relationship",
  "smoke": "No",
  "drink": "Socially",
  "ethnicity": "South Asian"
}
```

- **Online Presence Status**:
- `PUT /status/online?userId=usr_man_101`
- `PUT /status/offline?userId=usr_man_101`

---

5. Domain 4: Discovery Feed & Search Settings

5.1 Main Feed Algorithm

- **Endpoint**: `GET /home/:userId`
- **Business Logic**:

1. Filters prospective matches based on user's gender, orientation, and search settings.
2. For heterosexual men: default feed shows women profiles.
3. **Strict Block Filtering**: Must exclude all users present in the caller's `blocked_users` table.
4. Returns curated card array with distance, bio, verification status, and gallery photos.

- **Success Response (200 OK)**:

```
[
  {
    "id": "usr_woman_201",
    "userId": "usr_woman_201",
    "name": "Ananya Roy",
    "displayName": "Ananya",
    "age": 24,
    "gender": "woman",
    "city": "Mumbai",
    "country": "India",
    "distance": "5 km away",
    "bio": "Architect & design lover.",
    "photoVerified": true,
    "isOnline": true,
    "lastActive": "5m ago",
    "photos": [
      "https://images.unsplash.com/photo-1494790108377-be9c29b29330?w=800"
    ],
    "appearance": "Attractive",
    "bodyType": "Slim",
    "height": 165,
    "language": "English, Spanish",
    "lookingFor": "Long-term relationship",
    "smoke": "No",
    "drink": "No"
  }
]
```

5.2 Filtered Search

- **Endpoint**: `POST /search` (or `POST /users/filter`)
- **Request Body**:

```
{
  "ageRange": [21, 32],
  "distance": 50,
  "searchWorldwide": false,
  "showMe": ["women"],
  "lookingFor": ["Relationship"],
  "bodyType": "Slim",
  "height": [150, 175],
  "smoke": "No",
  "drink": "No"
}
```

(Note: Men can select `showMe: ["women"]`, `["men"]`, or `["women", "men"]`)

5.3 Recent & Online Feeds

- **Online Members**: `GET /dashboard/online`
- **Newest Members**: `GET /dashboard/recent`

---

6. Domain 5: Connections, Invites & Mutual Matches

6.1 Send Connection Invitation

- **Endpoint**: `POST /connections/send`
- **Quota Enforcement**:
- Checks sender's active subscription tier in `subscriptions` table.
- Free: 0 or restricted daily invites.

- Silver: 10 invites / day.
- Gold: 20 invites / day.
- Elite: Unlimited invites.
- If limit reached: Returns **403 Forbidden** with `code: "QUOTA_EXCEEDED"`.
- **Request Body**:

```
{
  "senderId": "usr_man_101",
  "receiverId": "usr_woman_201"
}
```

- **Success Response (200 OK)**:

```
{
  "status": "success",
  "message": "Invitation sent successfully",
  "data": {
    "id": 501,
    "requestId": "req_501",
    "senderId": "usr_man_101",
    "receiverId": "usr_woman_201",
    "status": "PENDING",
    "createdAt": "2026-10-14T16:00:00Z"
  }
}
```

6.2 Sent & Received Invites

- **Sent**: `GET /connections/sent?userId=usr_man_101`

```
[
  {
    "id": 501,
    "requestId": "req_501",
    "senderId": "usr_man_101",
    "receiverId": "usr_woman_201",
    "status": "PENDING",
    "createdAt": "2026-10-14T16:00:00Z",
    "receiverProfile": { "name": "Ananya Roy", "photos": ["https://..."] }
  }
]
```

- **Received**: `GET /connections/received?userId=usr_woman_201`
- **Accept Invitation**: `PUT /connections/accept`
- Request Body: `{ "requestId": "req_501", "userId": "usr_woman_201" }`
- Response:

```
  {
    "status": "success",
    "message": "Connection accepted. You can now chat on Telegram!",
    "match": true,
    "telegramLink": "https://t.me/rahul_amara"
  }
```

- **Reject Invitation**: `PUT /connections/reject` `{ "requestId": "req_501" }`
- **Check Status**: `GET /connections/status?senderId=usr_man_101&receiverId=usr_woman_201`
- Response: `{ "status": "PENDING", "requestId": "req_501", "canInvite": false }`
- **Mutual Matches List**: `GET /connections/list?userId=usr_man_101`

- Returns array of accepted connections with unlocked Telegram links.
- **Restore Access**: `POST /connections/restore-access` `{ "requestId": "req_501" }`

---

7. Domain 6: Telegram Connect & Direct Chat Unlocking

The AMARA platform unlocks authentic 1-on-1 private messaging via Telegram upon mutual match:

7.1 Telegram Integration Architecture

- **Direct Match Chatting (User-to-User)**:
- When two users match or an invitation is accepted, the frontend directly opens the matched user's personal Telegram handle via `tg://resolve?domain=<username>` (falling back to `https://t.me/<username>`).
- **Does NOT require a bot** to facilitate the chat — it connects users directly in Telegram DMs.
- **Official Amara Telegram Bot (`@amara_dating_bot`)**:
- Used during onboarding (Step 5: Connect Telegram) to verify identity, welcome users, provide login/help commands (`/start`, `/login`, `/help`, `/connect`), and dispatch match/invitation alerts.

7.2 API Endpoints

- **Connect Username**: `POST /telegram/connect`
- Request: `{ "userId": "usr_man_101", "username": "rahul_amara" }`
- Response (200 OK):

```
{
  "status": "success",
  "message": "Telegram account connected successfully",
  "telegramUsername": "rahul_amara",
  "telegramLink": "https://t.me/rahul_amara"
}
```

- **Get Link**: `GET /telegram/link?userId=usr_man_101`
- Response (200 OK):

```
{
  "status": "success",
  "telegramUsername": "rahul_amara",
  "telegramLink": "https://t.me/rahul_amara"
}
```

- **Disconnect**: `DELETE /telegram/disconnect?userId=usr_man_101`
- Response (200 OK):

```
{
  "status": "success",
  "message": "Telegram account disconnected successfully"
}
```

7.3 Backend Developer Guide: Production Setup & Hosting for the Telegram Bot

> [!IMPORTANT] The mobile frontend connects to the official Telegram Bot via `tg://resolve?domain=amara_dating_bot` (or `https://t.me/amara_dating_bot`). For the bot to actively greet users, handle commands (`/start`, `/help`, `/login`, `/connect`), and dispatch alerts, the backend must run a Telegram Bot service. *Note on Direct Chatting*: When two users mutually match or approve an invitation, the mobile app opens their 1-on-1 personal Telegram chat directly

> (`https://t.me/<username>`). **User-to-user chatting does NOT require a bot.** The bot is used strictly for onboarding assistance, account linking, customer support handoff, and optional match notification alerts.

Step 1: Create or Confirm the Production Bot with Telegram @BotFather

1. Open Telegram and search for `@BotFather`.
2. Run `/newbot` (or `/mybots` to inspect an existing bot).
3. Set the Bot Name (e.g., `Amara Dating`) and Username (e.g., `amara_dating_bot`).
4. Copy the API Token provided by BotFather (format: `123456789:ABCdefGhIJKlmNoPQRsTUVwxyZ`).
5. *(Note: If a different username is chosen, inform the frontend team to update `AMARA_BOT_USERNAME` in `src/utils/telegramHelper.ts`).*

Step 2: Implementation Architecture

Since the AMARA backend is built in **Java (Spring Boot)**, the backend team can choose between two straightforward approaches:

Option A: Native Java Spring Boot Integration (Recommended)

Integrate the bot directly into the Spring Boot backend using the official Telegram Spring Boot Starter.

1. Add Maven Dependency (`pom.xml`):

```
<dependency>
    <groupId>org.telegram</groupId>
    <artifactId>telegrambots-spring-boot-starter</artifactId>
    <version>6.9.7.1</version>
</dependency>
```

2. Configure Application Properties (`application.properties` / `application.yml`):

```
# Telegram Bot Configuration
telegram.bot.username=amara_dating_bot
telegram.bot.token=${TELEGRAM_BOT_TOKEN:123456789:ABCdefGhIJKlmNoPQRsTUVwxyZ}
```

3. Java Bot Component (`AmaraTelegramBot.java`):

```
package com.amara.bot;

import org.springframework.beans.factory.annotation.Value;
import org.springframework.stereotype.Component;
import org.telegram.telegrambots.bots.TelegramLongPollingBot;
import org.telegram.telegrambots.meta.api.methods.send.SendMessage;
import org.telegram.telegrambots.meta.api.objects.Update;
import org.telegram.telegrambots.meta.exceptions.TelegramApiException;

@Component
public class AmaraTelegramBot extends TelegramLongPollingBot {

    @Value("${telegram.bot.username}")
    private String botUsername;

    @Value("${telegram.bot.token}")
    private String botToken;

    @Override
    public String getBotUsername() {
        return botUsername;
    }
```

```
    @Override
    public String getBotToken() {
        return botToken;
    }

    @Override
    public void onUpdateReceived(Update update) {
        if (update.hasMessage() && update.getMessage().hasText()) {
            String text = update.getMessage().getText();
            long chatId = update.getMessage().getChatId();
            String firstName = update.getMessage().getFrom().getFirstName() != null
                ? update.getMessage().getFrom().getFirstName() : "there";

            if (text.startsWith("/start")) {
                sendReply(chatId, "   *Welcome to Amara Dating, " + firstName + "!*\n\n"
                    + "Your Telegram account is connected.\n\n"
                    + "Quick commands:\n"
                    + "• /help - Support and how matching works\n"
                    + "• /login - Open Amara login instructions\n"
                    + "• /connect - Link your Telegram username in app");
            } else if (text.startsWith("/help")) {
                sendReply(chatId, "✨ *Amara Support & Help*\n\n"
                    + "• *How Amara Works:* When someone sends an invite and both profiles accept, your handles connect fo
                    + "• *Support:* Open the Amara app, go to *Profile* → *Support* to submit a ticket.");
            } else if (text.startsWith("/login")) {
                sendReply(chatId, "   *Log In to Amara*\n\n"
                    + "1. Open the Amara app on your mobile device.\n"
                    + "2. Sign in with your registered phone or email.\n"
                    + "3. Go to *Profile* → *Telegram* to confirm your handle is linked.");
            } else if (text.startsWith("/connect")) {
                String username = update.getMessage().getFrom().getUserName();
                if (username != null && !username.isBlank()) {
                    sendReply(chatId, "   *Your Telegram Username:* @" + username + "\n\n"
                        + "To link it to Amara:\n"
                        + "1. Open the Amara app.\n"
                        + "2. Go to *Profile* → *Telegram*.\n"
                        + "3. Enter `" + username + "` and tap *Connect*.");
                } else {
                    sendReply(chatId, "⚠  *No Telegram Username Set*\nPlease set a public username in Telegram Settings be
                }
            }
        }
    }

    public void sendReply(long chatId, String messageMarkdown) {
        try {
            execute(SendMessage.builder()
                .chatId(String.valueOf(chatId))
                .text(messageMarkdown)
                .parseMode("Markdown")
                .build());
        } catch (TelegramApiException e) {
            System.err.println("Error sending Telegram message: " + e.getMessage());
        }
    }
}
```

4. Dispatching Automated Match Push Notifications from Java Service:

When a connection request is accepted (`PUT /connections/accept`), the Spring service can automatically notify the users via Telegram:

```
@Autowired
private AmaraTelegramBot telegramBot;

public void notifyUserOnMatch(Long telegramChatId, String matchedUserName) {
    if (telegramChatId != null && telegramChatId > 0) {
        telegramBot.sendReply(telegramChatId,
            "   *It's a Match!*\n\n"
            + "You and *" + matchedUserName + "* liked each other on Amara!\n"
            + "Open Amara or start chatting directly on Telegram.");
    }
}
```

Option B: Standalone Node.js Microservice (Alternative)

If the backend team prefers keeping the bot completely decoupled from the Spring Boot JVM process, the codebase includes a pre-built standalone bot daemon in the `telegram-bot/` directory.

1. Configure Environment (`telegram-bot/.env`):

```
TELEGRAM_BOT_TOKEN="YOUR_REAL_BOT_TOKEN_FROM_BOTFATHER"
APP_LOGIN_URL="amara://login"
```

2. Run 24/7 on the Linux Server using PM2:

```
cd telegram-bot
npm install --production
sudo npm install -g pm2
pm2 start bot.js --name "amara-telegram-bot"
pm2 save
pm2 startup
```

Step 3: Verification & Health Check

1. Search for your bot handle (e.g. `@amara_dating_bot`) on Telegram.
2. Send `/start`. The bot will immediately reply with the welcome card and instructions.
3. Send `/help` and `/connect` to verify all commands respond correctly.

---

8. Domain 7: Subscriptions & Payments (Razorpay)

8.1 Plan Hierarchy

Plan Code	Price (INR)	Validity	Daily Invites	Key Features
FREE	₹0	Unlimited	0 (or trial)	Browse discovery feed
SILVER	₹1,499	30 Days	10 / day	Unlocks Telegram chat, standard search
GOLD	₹2,999	90 Days	20 / day	Priority discovery, worldwide search, badge

8.2 Create Razorpay Order

- **Endpoint**: `POST /razorpay/create-order`
- **Request**: `{ "plan": "GOLD", "userId": "usr_man_101" }`
- **Success Response (200 OK)**:

```
{
  "status": "success",
  "orderId": "order_RZP_102938",
  "amount": 299900,
  "currency": "INR",
  "key": "rzp_live_xxxxxxxxxxxx",
  "plan": "GOLD",
  "name": "Amara Gold Plan",
  "description": "Unlimited invitations & priority matching for 90 days"
}
```

8.3 Verify Signature & Activate Subscription

- **Endpoint**: `POST /razorpay/verify`
- **Verification Algorithm**:

```
# Server-side signature check
expected_signature = hmac.new(
    bytes(RAZORPAY_SECRET, 'utf-8'),
    bytes(order_id + "|" + payment_id, 'utf-8'),
    hashlib.sha256
).hexdigest()
```

- **Request Body**:

```
{
  "orderId": "order_RZP_102938",
  "paymentId": "pay_RZP_998877",
  "signature": "a1b2c3d4e5f6...",
  "plan": "GOLD",
  "userId": "usr_man_101"
}
```

- **Success Response (200 OK)**:

```
{
  "status": "success",
  "message": "Payment verified and subscription activated successfully",
  "plan": "GOLD",
  "durationDays": 90,
  "expiresAt": "2027-01-12T16:00:00Z"
}
```

8.4 Check Subscription Status & Days Remaining

- **Status**: `GET /subscriber/status?userId=usr_man_101`

```
{
  "isSubscriber": true,
  "plan": "GOLD",
  "status": "ACTIVE",
  "expiresAt": "2027-01-12T16:00:00Z",
  "daysRemaining": 90,
  "dailyRequestLimit": 20
}
```

- **Days Remaining**: `GET /subscriber/remaining-days?userId=usr_man_101`

```
{
  "remainingDays": 90,
  "plan": "GOLD",
  "isActive": true
}
```

- **Webhook**: `POST /razorpay/webhook` (handles `order.paid`, `payment.failed`, `subscription.cancelled`)

---

9. Domain 8: Geolocation & Multi-City Matching

- **Add New Location**: `POST /location/add`
- Request: `{ "userId": "usr_man_101", "city": "Mumbai", "state": "Maharashtra", "country": "India", "latitude": 19.0760, "longitude": 72.8777 }`
- Response: `{ "status": "success", "locationId": 10 }`
- **Switch Active Location**: `PUT /location/switch?userId=usr_man_101&locationId=10`
- **Location History**: `GET /location/history/:userId`
- **Current Location**: `GET /location/current/:userId`
- **Nearby Profiles by Radius**: `GET /location/nearby?userId=usr_man_101&radius=50`

---

10. Domain 9: Safety, User Reporting & Blocking

10.1 Block User

- **Endpoint**: `POST /reports/block` (or `POST /users/block`)
- **Immediate Effect**:
- When User A blocks User B, User B is immediately removed from User A's discovery feed, search results, and chat inbox.
- User A is also removed from User B's feeds.
- **Request Body**:

```
{
  "blockerUserId": "usr_man_101",
  "blockedUserId": "usr_woman_207"
}
```

- **Success Response (200 OK)**:

```
{
  "status": "success",
  "message": "User has been blocked. They will no longer appear in your feeds or messages.",
  "blockedUserId": "usr_woman_207"
}
```

- **List Blocked Users**: `GET /reports/blocked?userId=usr_man_101` (or `GET /users/blocked`)
- **Unblock User**: `POST /reports/unblock` (or `POST /users/unblock`)
- Request: `{ "blockerUserId": "usr_man_101", "unblockedUserId": "usr_woman_207" }`
- Response: `{ "status": "success", "message": "User unblocked successfully." }`

10.2 Report Profile

- **Endpoint**: `POST /reports/report`
- **Request Body**:

```
{
  "reporterUserId": "usr_man_101",
  "reportedUserId": "usr_woman_207",
  "reason": "SPAM_SCAM",
  "details": "Soliciting external money transfer links."
}
```

(Allowed reasons: `"SPAM_SCAM"`, `"INAPPROPRIATE_PHOTOS"`, `"HARASSMENT"`, `"UNDERAGE"`, `"FAKE_PROFILE"`, `"OTHER"`*)*

- **List Reports by User**: `GET /reports/my?userId=usr_man_101`
- **Moderator Queue**: `GET /reports/against` & `PUT /reports/resolve/:reportId` `{ "status": "RESOLVED" }`

---

11. Domain 10: Help Desk & Customer Support

- **Create Support Ticket**: `POST /support/create`
- Request: `{ "userId": "usr_man_101", "subject": "Verification Question", "message": "How do I upgrade to Gold plan?", "priority": "MEDIUM" }`
- Response: `{ "status": "success", "ticketId": "ticket_101", "status": "OPEN" }`
- **List User's Tickets**: `GET /support/my?userId=usr_man_101`
- **Filter Tickets**: `GET /support/status?userId=usr_man_101&status=OPEN`
- **Close Ticket**: `PUT /support/close/:ticketId`

---

12. Domain 11: Notifications & Communication Logs

- **Get In-App Notifications**: `GET /notification?userId=usr_man_101`

```
[
  {
    "id": "notif_1",
    "userId": "usr_man_101",
    "title": "New Match!",
    "message": "Ananya accepted your invitation.",
    "type": "MATCH",
    "read": false,
    "createdAt": "2026-10-14T15:00:00Z"
  }
]
```

- **Mark Read**: `PUT /notification/read/:id`
- **Get Preferences**: `GET /notification/preferences?userId=usr_man_101`

```
{
  "userId": "usr_man_101",
  "emailNotifications": true,
  "pushNotifications": true,
  "matchAlerts": true,
  "invitationAlerts": true
}
```

- **Update Preferences**: `PUT /notification/preferences`
- Request: `{ "emailNotifications": true, "pushNotifications": false }`
- **Email Dispatch Log**: `GET /emails/my?userId=usr_man_101`
- **Trigger Push Notification**: `POST /notification/push` `{ "userId": "usr_man_101", "title": "...", "body": "..." }`

13. Domain 12: Legal, Terms & Privacy Acceptance

- **Check Terms Status**: `GET /privacy/status?userId=usr_man_101`
- Response: `{ "accepted": true, "version": "2.1", "acceptedAt": "2026-10-14T10:00:00Z" }`
- **Accept Terms**: `POST /privacy/accept`
- Request: `{ "userId": "usr_man_101", "version": "2.1" }`
- Response: `{ "status": "success", "message": "Terms accepted successfully" }`
- **Fetch Privacy Content**: `GET /privacy/details`

14. Domain 13: Core Relational Data Model Architecture

The backend database model consists of the following core entity definitions and relationships:

Entity Name	Primary Key	Key Foreign Keys	Purpose & Attributes
users	`user_id` (VARCHAR)	—	Core auth credentials: `email`, `mobile`, `password_hash`, `name`, `gender`, `telegram_username`, `status`
user_profiles	`id` (SERIAL)	`user_id` → `users`	Extended dating profile: `age`, `dob`, `bio`, `height`, `appearance`, `body_type`, `language`, `net_worth`, `looking_for`, `smoke`, `drink`, `photo_verified`, `is_online`
user_images	`id` (SERIAL)	`user_id` → `users`	Up to 6 gallery images per user: `image_url`, `is_profile` (boolean), `slot_index` (0-5)
connections	`id` (SERIAL)	`sender_id`, `receiver_id` → `users`	Dating invitations: `status` ('PENDING', 'ACCEPTED', 'REJECTED', 'CANCELLED'), `created_at`
subscriptions	`id` (SERIAL)	`user_id` → `users`	Razorpay memberships: `plan` ('FREE', 'SILVER', 'GOLD'), `razorpay_order_id`, `razorpay_payment_id`, `expires_at`
user_locations	`id` (SERIAL)	`user_id` → `users`	GPS & multi-city coordinates: `city`, `state`, `country`, `latitude`, `longitude`, `is_current`
reports	`id` (SERIAL)	`reporter_user_id`, `reported_user_id`	Moderation & abuse reports: `reason`, `details`, `status` ('OPEN', 'RESOLVED')
blocked_users	`id` (SERIAL)	`blocker_user_id`, `blocked_user_id`	User block relationships preventing discovery and interaction
app_translations	`id` (SERIAL)	—	Dynamic localization storage: `string_key`, `lang_code`, `translation_text`

15. Domain 14: Multi-Language Application Translations (10 Languages / 635 Keys Each)

The AMARA mobile client provides comprehensive localization across **10 international languages** with exactly 635 standardized dot-notated string keys per language.

Below are the complete, production-ready string dictionaries for all 10 supported languages ready for database seeding or backend dictionary serving:

15.1 English (`en` — 635 Keys)

```
{
  "home.homeheader.dont_miss_a_new_invite_get_notified_instantly": "Don't miss a new invite — get notified instantly",
  "home.homeheader.notify_me": "Notify me!",
  "home.homeheader.amara": "Amara",
  "home.homeheader.curated_private_matches": "Curated private matches",
  "home.homeheader.last_active": "Last Active",
